WHO I AM

A web 2.0 developer highly proficient in a wide array of web technologies including **HTML, CSS, JavaScript, PHP, Python, Ruby, Groovy, MySQL and Flash**. I write clean, efficient code that works.

WHERE I'VE BEEN

2010 **Optaros - Senior UX Developer**. Provided high quality deliverables and lead small development teams. Consulted on current user-interface best practices, especially using next-generation technologies in enterprise applications and B2C websites.

2009 - 2010 **Center for Digital Imaging Arts at Boston University - Adjunct Faculty, Web Development**. Taught classes on subjects including HTML/CSS, Javascript/Ajax, PHP/MySQL and Flash/Flex. Trained students in modern techniques and best practices. Wrote curriculum for many of the courses.

2008 **Grove Marketing - Web Developer**. Developed custom backend tools for websites with PHP/MySQL. Worked with Flash and Actionscript to develop rich media banner campaigns and website components.

2007 - 2008 **3000k - XHTML/CSS/Javascript Specialist**. Performed website development tasks for both web sites and web applications using both front and backend technologies including Flash.

2006 - 2007 **Web Developer at Staples**. Developed custom internal web applications to increase workflow efficiency. Ported legacy ASP code to never standards based PHP code. Developed HTML email campaigns. Created new and edited existing client sites.

2005 - 2010 **Freelance Web Developer**. Individually responsible for developing websites and web applications while working extensively with designers and project managers to surpass client expectations.
